About me

With experience in developing efficient and user-friendly web backends, I am dedicated to delivering innovative solutions that meet unique needs. I value effective communication and staying up-to-date with the latest web development advancements. With these skills and values, I am confident that I can bring value to any team.

Experience

Cynbus | Junior Backend Developer

August 2022 - Present

- Developed logical and database components for commercial products using **Django** and **REST API**
 - Proficient in deploying products on cloud platforms like **Digitalocean**
 - Created CMS using **HTML**, **CSS**, **Bootstrap**, **jQuery**, and **AJAX**
-

Projects

Food for All

- Developed Food for All, a web application aimed at combating food waste and hunger. Created in a 36-hour hackathon called FossHack3 by Foss United, my teammate and I utilized **Django Rest framework** and **Nextjs** to build a surplus food management system.

Orphanage Dashboard

- Created a dashboard for an orphanage using Django for the backend and **HTML**, **CSS**, and **Bootstrap** for the front-end. This non-profit project aims to digitize student data and allow sponsors to track their performance and expenses. Future plans include building a public-facing front-end and integrating a transaction system for fundraising.
-

Skills

Django	Python	Rest API	PostgreSQL	HTML	CSS
Bootstrap	Digitalocean	JavaScript	jQuery	Ajax	

Education

Safi Institute of Advanced Study | Bachelor of Computer Application

July 2019 - April 2022

- Bachelor's in Computer Application from Safi Institute of Advanced Study, University of Calicut in 2022 with a **CGPA of 6.2**.
